

**Paul Hemmer Jr.** President and CEO

**SUMMARY**

As President, Paul Hemmer is accountable for the performance and satisfaction of the company to its customers, shareholders, and employees. Paul is actively involved in Hemmer's business development and project management.

**BACKGROUND**

Paul is proud to continue the Hemmer family's building legacy that has now served the region for nearly a century. Today, in addition to being the chief executive, he acts as project manager on various projects; supports project teams; and participates in the company's sales. He utilizes his substantial knowledge to influence building design: lower initial cost, shorten the construction schedule, provide flexibility for future expansion and lower operating expenses. The expertise he has developed is helpful to every Hemmer customer.

To Paul, the Hemmer's business is very personal. He strives for the project team to build respectful relationships with customers that open lines of communication so a project will be a success. And, one that will ensure Paul Hemmer Company will be the preferred vendor for any future work. This commitment could be why Hemmer sees so much repeat business from satisfied customers.

**EDUCATION**

Paul received his Bachelor and Master of Science degrees in Civil Engineering from Purdue University. Paul is a past member of Chi Epsilon, Purdue's Civil Engineering honorary academic society, and is a registered Professional Engineer.
